INTRODUCTION

The Nigeria Network of NGOs (NNNGO), the first generic Network for NGOs in Nigeria was established in 1992 and is the implementing Civil Society Organisation (CSO) in Lagos State for "Partnership for Advocacy in Child and Family Health@Scale" (PACFaH@Scale). PACFaH@Scale is an innovative 5-year Health Accountability project funded by the Bill and Melinda Gates Foundation, and coordinated by a leading Nigerian Healthcare Consultancy Firm, development Research and Project Center (dRPC).

NNNGO-PACFaH@Scale is focusing on advocating in Lagos state for:

(a) Long term financing plan to fund Routine Immunization from domestic resources

(b) Increased funding for Family Planning

The PACFaH@Scale program is implemented through a partnership with 2 government agencies (NILS and NIPSS) as well as 7 indigenous CSOs - 3 at the National level and in 4 States – Kano, Kaduna, Niger and Lagos States. It has four program areas –

(i) Family Planning
(ii) Routine Immunization
(iii) Nutrition
(iv) Treatment of Childhood Pneumonia/Diarrhea
The Civil Society Organizations (CSO) mapping meeting was organized by NNNGO-PACFaH@Scale to address the Intermediate Outcome under the Result Tracker which states “Increased CSO coalition network to conduct technical reviews of the state’s new domestic funding schemes and to provide feasibility study updates in Niger, Kaduna, Kano and Lagos”. The active role Civil Society Organizations play especially in health advocacy, necessitates establishing partnerships with such organisations if health development is to be sustainable.

The meeting was held at the O.L.A. Conference Centre, Maryland, Lagos State on 29th March, 2018 with 25 CSOs in attendance. The objectives of the meeting were to-

- Produce a directory of relevant CSOs involved in RI and FP advocacy in Lagos state
- Carry out a rapid organizational and capacity assessment of the CSOs
- Obtain verifiable information on strengths, weaknesses, opportunities and threats to programming in the areas of funding for RI an FP, especially as it relates to advocacy and budget tracking
- Form a basis for capacity training of CSOs on the above stated issues.
**METHODOLOGY**

The methodology involved Questionnaire administration (both online and offline) and Group Breakout Sessions (based on area of focus – RI or FP). Questionnaire administration was done either online (in which the questionnaire was sent via email to the CSOs) or offline (in which the representative of the CSOs filled the questionnaire at the venue of the meeting). A total of 18 copies of the questionnaire had been completed as at the time of this report. The Group Breakout Sessions were conducted during the meeting with 10 CSOs under the RI group and 15 CSOs under the FP group.

*Pre-assessment planning*

To ensure maximum participation and input from the CSOs, the NNNGO-PAS Team held a planning meeting to identify the potential CSO respondents as well as finalise the scope and content of the questionnaire and the group breakout sessions.

*Data collection methods*

The questionnaire was developed following review of literature and other relevant information. It was divided into the following sections:

- **Section A** - Civil Society Organization (CSO) Identification Data
- **Section B** - CSO Organizational Profile
- **Section C** - CSO Activities & Coverage
- **Section D** - Organizational Personnel & Financial Capacity
- **Section E** - Past Experiences & Record
- **Section F** - Innovativeness & Readiness to Be Engaged
The group breakout sessions (based on the focus areas of RI and FP) concentrated on identifying

- Priority Advocacy Issues
- Advocacy Targets
- Advocacy Messages

Data collection

A total of 18 CSOs completed and submitted their questionnaire as at the time of this report, with the remaining copies of the questionnaire still expected to be submitted. The data was entered using Microsoft Excel. All subsequently completed questionnaire copies will also be entered and included in the NNNGO-PAS CSO directory which will be updated on a continuous basis.

For the group breakout sessions, the CSOs were grouped under the two focus areas – RI and FP, following discussions with the CSO representatives which centred on area of expertise, experience and major advocacy engagements. This session was conducted after the questionnaire administration had been completed.

FINDINGS

Questionnaire administration

The results obtained from the respondents under each section of the questionnaire are highlighted below-
(a) Civil Society Organization (CSO) Identification Data:

</thead>
</table>
| Inadequate release of FP budget allocation | ❖ Director of Budget MBEP  
❖ Director of family Health and Nutrition  
❖ PS PHCDA  
❖ Director Medical Services PHCDA | Release FP budget allocated funds timely |
| No budget line item for FP consumables | ❖ PS Ministry of Health  
❖ PS Ministry Budget and Economic Planning  
❖ Director of Budget MBEP  
❖ Director of family Health and Nutrition  
At LGA Level  
❖ Medical of Health  
❖ FP Manager  
❖ Budget Officer  
❖ Supervisor of Health  
❖ Head of Administration | Create a budget line item for FP consumables |
### Additional Issues

The following were highlighted by the media organisations present as being important for successful advocacy to policy and decision makers –

- Need for NGOs and CSOs to collaborate with media groups and organisations
- Use social media platforms (and not only traditional methods such as radio, television, etc.) in carrying out advocacies
- Ensure media coverage of advocacy activities as much as possible so as to help amplify the advocacy messages
NEXT STEPS

▪ Compile and produce a database containing detailed information on CSOs involved in RI and FP advocacy in Lagos
▪ Plan a capacity building training to address the identified shortcomings and weaknesses as a result of the CSO mapping meeting
▪ Develop advocacy messages which are founded on the prevailing RI & FP situation in Lagos State
▪ Plan a constituency mobilization meeting of CSOs, CSO networks/coalitions and the media in preparation for advocacy visits
